Select an item type

**Freestyle project**  
Classic, general-purpose job type that checks out from up to one SCM, executes build steps serially, followed by post-build steps like archiving artifacts and sending email notifications.

**Pipeline**  
Defines long-running activities that can span multiple build agents. Suitable for building jobs that are highly modular and organized into reusable components that can be easily fit in free-style job type.

127.0.0.1:5000 x Linux x task1 Config - x

localhost:8080/job/task1/configure

Dashboard > task1 > Configuration

☐ Terminate a build if it's stuck

☐ With Ant ?

## Build Steps

Automate your build process with ordered tasks like code compilation, testing, and deployment.

Add build step ^

Filter

Execute Windows batch command

Execute shell

Invoke Ant

Invoke Gradle script

Invoke top-level Maven targets

Run with timeout

Set build status to "pending" on GitHub commit
